

MESSAGE DEVICE

Abstract of the Disclosure:

5 Message device for an item of furniture for sitting
and/or lying on, having a first shaft and a second shaft
which are supported parallel with one another in a frame,
and having at least one arm which carries at least one
message body, the arm being coupled to the two shafts in
such a manner that a rotation of the shafts brings about a
10 message movement of the message body in a first and/or
second direction. Means are also provided for displacing
the message body relative to the frame and they are formed
by means for changing the distance between the two shafts.
